

Jen Walker

Date

FAO Veterinary surgeon

**Reference animal(s):**

I am writing to you to request your permission to treat the above named animal(s) with The Bowen Technique.

**Please find enclosed Veterinary “permission to treat” form(s).**

I have been a physical therapist in full time professional practice treating people since 1993. My main qualifications are in Bowen Technique, Shiatsu Acupressure Massage, Neuro-structural Integration Technique and Healing. I am fully qualified and have professional practice insurance to treat both people and animals, and also qualified and registered to practice with the School of Canine Bowen Therapy.

Since 1999 I have been developing my work to address soft tissue injuries, mobility and structural issues in animals. Working very successfully with Cats, Dogs, and Horses over these years.

The treatments given are non-invasive. They do not involve any firm physical manipulation of joints, do not puncture the body, and do not involve preparations / medications taken, orally or otherwise.

I inform all clients that these treatments are not a substitute for Veterinary diagnosis and treatment and I recommend they see a Veterinarian for that service. Any animal that presents concerning signs or symptoms will be immediately referred back to you as their Veterinary Surgeon.

I thank you in advance for your time and effort.

If you require further information you are most welcome to contact me directly, details below.
